

Task:

-----

1. verify if these packages are installed or not. then,
2. install the following packages using RPM.
  - vsftpd
  - ftp
  - telnet
  - php

## Solution -

```
[root@svr Packages]# rpm -q vsftpd
vsftpd-3.0.2-28.el7.x86_64
[root@svr Packages]# rpm -q ftp
package ftp is not installed
[root@svr Packages]# rpm -q telnet
telnet-0.17-65.el7_8.x86_64
[root@svr Packages]# rpm -q php
package php is not installed
[root@svr Packages]#
```

```
[root@svr Packages]# rpm -q vsftpd ftp telnet php
vsftpd-3.0.2-28.el7.x86_64
package ftp is not installed
telnet-0.17-65.el7_8.x86_64
package php is not installed
[root@svr Packages]#
[root@svr Packages]# rpm -ivh ftp-0.17-67.el7.x86_64.rpm php-5.4.16-48.el7.x86_64.rpm
error: Failed dependencies:
